Art Unit: 1746

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 2, 3, 4, 7, 8, 11 and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is noted that applicant claims a plurality of "independently-actuated" automatic mechanisms the examiner can find no support for the same. While the specification can support a claim for a *plurality* of automatically actuated mechanisms, it is not seen where the actuators are independently actuated. Clarification is required.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Sakai et al., Tung et al., Matsuyama et al.'171 and '723, note the seal means.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.
